yes
Memory Summarizer
Update MongoDB memory
Workflow 1: Knowledge Ingestion
Manual Trigger
Define collections packages, FAQs, policies, destinations, services
Split collections and process each batch
HuggingFace embeddings intfloat/multilingual-e5-large
embeddings
Qdrant vector store tourism_vdb cosine similarity
Read raw JSON from MongoDB
Code node flatten JSON into readable text extract metadata payload
Workflow 2: Telegram Inbox
Telegram Trigger new message
Message type?
Voice note
Download Telegram audio
Code node normalize audio file
Groq Whisper STT whisper-large-v3-turbo
Text message
Define input variable text or transcription
Typing status
Call Agent API webhook
Format response Telegram MarkdownV2-safe
Send Telegram reply
